### Company Overview

Precipio has built a platform designed to eradicate the problem of misdiagnosis by harnessing the intellect, expertise and technology developed within academic institutions and delivering quality diagnostic information to physicians and their patients worldwide. Through its collaborations with world-class academic institutions specializing in cancer research, diagnostics, and treatment such as the Yale School of Medicine, Harvard's Dana-Farber Cancer Institute, and the University of Pennsylvania, Precipio offers a new standard of diagnostic accuracy enabling the highest level of patient care.

Precipio has two divisions: Clinical Diagnostics Division which operates the company's CLIA/CAP laboratory that services office-based oncologist practices and hospitals to provide comprehensive diagnostic service on their patient samples; and a Diagnostic Products Division which produces and sells proprietary diagnostic products to laboratories, enabling them to provide higher clinical accuracy as well as improved operational and economic performance.

### Role Description

The Cytogenetic Technician will be an integral part of a small team which is responsible for all aspects of daily workflow in the Cytogenetics wet lab. Expected to have excellent communication and organizational skills as well as utilize complex problem solving skills to aid in completing expected tasks as well as resolving potential workflow issues.

### Responsibilities

- Perform all work in compliance with company policy and within quality guidelines.
- Works with Cytogenetics team to complete all expected tasks in an accurate and timely manner.
- Works effectively as a team member within the department and with other departments to provide quality service through communication, cooperation and collaboration
- Maintains flexibility required to adapt to laboratory needs as related to testing and scheduling.
- Maintains and troubleshoots machinery as needed
- Report and escalate issues to teammates, supervisor, and management as needed.
- Manage Inventory

### Qualifications

Ideal candidate will have:

- Bachelor's degree in biological sciences (Biology, Chemistry, Life Sciences) or related area is required.
- Strong critical thinking and problem solving skills
- Sense of ownership and integrity of their work.
- A demonstrated ability to work as part of a team
- Demonstrated organizational skills; including but not limited to attention to detail and multitasking
- Excellent written and verbal communication skills.

### Compensation includes:

- Salary
- Performance based bonus
- Participation in company stock option plan
- All company benefits including health insurance
