### Company Overview

Precipio has built a platform designed to eradicate the problem of misdiagnosis by harnessing the intellect, expertise and technology developed within academic institutions and delivering quality diagnostic information to physicians and their patients worldwide. Through its collaborations with world-class academic institutions specializing in cancer research, diagnostics, and treatment such as the Yale School of Medicine, Harvard's Dana-Farber Cancer Institute, and the University of Pennsylvania, Precipio offers a new standard of diagnostic accuracy enabling the highest level of patient care.

Precipio has two divisions: its Clinical Diagnostics Division which operates the company's CLIA/CAP laboratory, servicing oncologist practices and hospitals to provide comprehensive diagnostic service on their patient samples, and the Diagnostic Products Division, which produces and sells proprietary diagnostic products to laboratories.

### Job Overview

The production manager will be overseeing the quality management and manufacturing of products developed by the R&D team. Expected to work closely with the R&D, sales and logistics teams to manage manufacturing processes, inventory and quality control processes in addition to setting up manufacturing processes for new products coming out of R&D. This position will be full time in New Haven, CT.

### Responsibilities

- Perform all work in compliance with company policy and within quality guidelines.
- Work with R&D team for the manufacturing, qualification, registration and distribution of diagnostic kits.
- Manage supply chain of critical reagents.
- Work with vendors as well as internal sales/marketing department to maximize efficiency, cost and productivity.
- Lead and monitor projects throughout development, execution, and commercialization.
- Develop and maintain accurate timelines for multiple projects.
- Develop user requirements, risk assessment, validation plans, protocols and other documents, as necessary.
- Report and escalate issues to management as needed.
- Negotiate, build, and maintain good relationships with all suppliers, distributors and vendors

### Qualifications

- Bachelor's degree in biomedical sciences (Biology, Chemistry, Life Sciences) or related area required.
- 5+ years of relevant experience in manufacturing in biotechnology/pharmaceutical/MedTech industry.
- Regulatory compliance knowledge and practical skills on GMP/ISO/QSR
- Proven work experience in project management.

### Ideal candidate will have:

- Excellent written and verbal communication and negotiation skills.
- Track record of success as a critical thinker, problem-solver, team player.
- Sense of ownership and integrity over their work.
- Solid organizational skills including attention to detail and multitasking.
